Disposable Pen 3ml cartridge

Single-use pen body · takes one 3ml cartridge

RESEARCH USE ONLY · NOT FOR HUMAN OR VETERINARY CONSUMPTION · NOT FOR SELF-ADMINISTRATION

A pre-assembled, single-use pen for cartridge-based laboratory work. Load a 3ml cartridge, fit a pen needle and work from a ready unit — nothing to assemble or configure.

HOW IT WORKS

The sealed body combines a cartridge chamber, a drive mechanism and a needle hub. It is built for one cartridge cycle: once the cartridge is spent, the pen is finished and disposed of.

RESEARCH CONTEXT

Takes standard 3ml glass cartridges and standard pen needles (sold separately). Not designed for cartridge exchange, larger cartridges or vial-based setups — for a refillable option, see the reusable pen.

WHAT'S IN THE BOX

- 1 × disposable pen body
- Takes one 3ml glass cartridge
- Compatible with standard pen needles

Storage & handling: Supplied non-sterile — wipe the exterior with 70% isopropyl alcohol and let it dry before use. Do not immerse or autoclave. Store dry at room temperature, out of direct sunlight, and dispose of with the needle as sharps waste after use.
