AEDG TETRAPEPTIDE · EXPERIMENTAL

Epithalon 50mg

Epithalon / Epitalon · 50mg vial

RESEARCH USE ONLY · NOT FOR HUMAN OR VETERINARY CONSUMPTION · NOT FOR SELF-ADMINISTRATION

Epithalon—also spelled Epitalon—is a synthetic Ala-Glu-Asp-Gly tetrapeptide developed from research on pineal-gland peptides.

HOW IT WORKS

Cultured-cell studies report changes in telomerase activity and telomere maintenance. These are molecular observations, not demonstrated anti-aging outcomes in people.

RESEARCH CONTEXT

The literature is dominated by laboratory and animal research. Small or low-certainty clinical reports do not establish a standard human dosing schedule.

VIAL CONTENTS & HANDLING

- 50mg Epithalon (Epitalon)
- Single lyophilised vial

Quality & sourcing. Sourced from established manufacturers who test using HPLC analysis. COA available on request — **ask us on WhatsApp ↗**

Storage: keep unopened lyophilised vials in a cool, dark place. Once reconstituted, store in the fridge at 2–8°C and use within 2 months.

RESEARCH REFERENCE DOSAGE

50mg vial · 3ml water · 16.67mg/ml

LEVEL	AMOUNT	U100 UNITS	FREQUENCY
Beginner	5mg	**30 units**	1× daily · morning · 10–20 day cycle
Intermediate	10mg	**60 units**	1× daily · morning · 10–20 day cycle
Advanced	10mg	**60 units / admin**	2× daily · morning + evening · 10–20 day cycle

Fixed 3ml · U100 device (1 unit = 0.01ml). Advanced is 60 units per administration, twice daily. Source-reference cycles may be repeated every 3–6 months. Research reference only.

Dosing status: No established approved dosing or evidence-based beginner schedule.
