TOOLS · SYRINGES

Insulin Syringes 1ml · 10 pack

1ml U-100 syringes with fixed needle · pack of 10

RESEARCH USE ONLY · NOT FOR HUMAN OR VETERINARY CONSUMPTION · NOT FOR SELF-ADMINISTRATION

Ten sterile, individually sealed 1ml syringes with a fixed fine needle. The barrel is graduated to 100 units (U-100), so small volumes can be measured straight from the vial.

HOW IT WORKS

U-100 graduations in single units mean 1 unit = 0.01ml — no conversion step. The plunger seats close to the hub for low dead space, keeping loss of reconstituted material to a minimum.

RESEARCH CONTEXT

Needle gauge and length depend on current stock (typically a fine 29–31G, 6–8mm fixed needle) — ask on WhatsApp if you need a specific size. For pen devices, use pen needles instead.

WHAT'S IN THE BOX

- 10 × 1ml insulin syringes
- U-100 scale · 100 units per ml
- Fixed needle · gauge & length per current stock
- Individually sealed · sterile

Storage & handling: Supplied sterile and individually wrapped — do not use if the wrapper is torn or damp. Single use only: never recap by hand or reuse; discard straight into a sharps container. Store dry at room temperature.
