Reusable Pen 3ml cartridge

Refillable pen body · takes standard 3ml cartridges

RESEARCH USE ONLY · NOT FOR HUMAN OR VETERINARY CONSUMPTION · NOT FOR SELF-ADMINISTRATION

A durable, refillable pen for cartridge-based laboratory work. Swap in a fresh 3ml cartridge and a new pen needle each cycle — the pen body itself is kept and reused.

PRICING · PER UNIT

Mix & match any vials — 2–4 −10%, 5+ −15%

HOW IT WORKS

A dial sets the volume per click and the drive mechanism advances the cartridge plunger by exactly that amount. Unlike the disposable pen, the cartridge holder unscrews so spent cartridges can be replaced.

RESEARCH CONTEXT

Works with the reusable pen kit (3ml empty cartridge + breather needle) and standard pen needles. Confirm the units-per-click against the pen's manual before relying on any setting.

WHAT'S IN THE BOX

- 1 × reusable pen body
- Takes standard 3ml cartridges
- Compatible with standard pen needles

Storage & handling: Wipe the exterior with 70% isopropyl alcohol between cycles; do not immerse or autoclave. Store dry with the cap on, at room temperature and out of direct sunlight. Always fit a new needle for each use.
